

ONUkwili Prince C.

Full Stack/Software developer

+234-907-1589-571

157 Candos Road, Baruwa, Ipaja

onukwili@gmail.com

EDUCATION

2021

Federal Science and Technical College

Attended high school at FSTC Yaba, Lagos Nigeria. Studied sciences and engineering

2022

Lagps state university

SKILLS

Full stack development	Webpack
.NET framework	HTML
CSS & SCSS	Javascript
React Js & Redux	Next Js
SQL	C#
RESTful API's	Node Js
MongoDB	Docker & Docker-compose

Hi there ! My name is Prince. I'm a seasoned software engineer with over a year of experience building and shipping high-quality software products. I have a passion for solving complex problems and delivering elegant solutions that empower users and drive business results.

My expertise spans the full software development lifecycle, from designing and architecting scalable systems to writing clean, maintainable code and deploying it to production.

I'm well-versed in a variety of programming languages and frameworks, including React Js, Next Js, Node Js, SASS, C#, .NET, MSSQL, MongoDB, Docker, and Azure, and I'm constantly learning and staying up-to-date with the latest industry trends and best practices.

WORK EXPERIENCE

2022

Momas ltd Nigeria

I developed a payment web application alongside fellow developers, in order for their customers to pay for the organisation's resources e.g Power/energy. The application was developed using React Js, SCSS, Java (JAX-RS) and MSSQL database

2021

Freelancer

I built an open-source JavaScript library called GOPack to help developers bundle their projects into static files using webpack.

PROJECTS

Meetup website <https://goit-meetup.netlify.app/>
Linkedin Profile <https://www.linkedin.com/in/prince-onukwili-a82143233>
Github Profile <https://www.github.com/onukwilip>

GOPack <https://github.com/onukwilip/gopack/wiki>

GOPack is a pre written javascript bundler, which was created using webpack. It configures your project to use the already existing webpack loaders and plugins to generate static files.

Skills used: JavaScript, Node Js, Webpack, Git

GOChat <https://gochat-tau.vercell.app>

GOChat is a chat web application where users from around the world can sign up and communicate with thier family and friends. It is currently in it's maintainance phase and was developed by Master Prince C. Onukwili, using React Js, Next Js and SCSS for the frontend. .NET, C# and MSSQL for it's backend, and Node Js for the web socket.

Skills used: React Js, Next Js, C#, .NET, Azure, Docker, SCSS

Portfolio <https://goit-prince-portfolio.netlify.app/>

This is my current portfolio website showcasing my skills and previous works, it was built using the React Js library and SCSS

Skills used: React Js, SCSS

NigTrak <https://nigtrak.netlify.app/>

This is a tracking web application (UI only), developed by me and my fellow teammates working at Momas Ltd. It is meant to track people wherever they are, but this is just the UI dashboard.

Skills used: React Js, SCSS

Online auction <https://auction-app-s9qv.onrender.com/>

This is an online auctioning application developed for a client on Fiverr, on this platform, people can post, and bid for products, all products has an expiry date, at which an email is sent to the highest bidder. It has a dashboard where you can track all your products and bids. It was developed using Next Js for both client and server side while MongoDB as the database, it is currently being deployed live using docker on Render.com

Skills used: React Js, Next Js, Docker, MongoDB, Ecommerce, SCSS

Use-ajax-request <https://www.npmjs.com/package/use-ajax-request>

This is a react Js hook meant to assist developers in making API calls, it handles states like: data, isLoading, error, etc. Read more about it on the page

Skills used: React Js

Use-manage-form <https://www.npmjs.com/package/use-manage-form>

The use-manage-form is a React hook used to manage form states in a component. E.g: data, isValid, onChange, etc...

Skills used: React Js

Momas Pay <https://goit-momas-pay.netlify.app/>

This is a payment web application (Frontend only) i developed for Momas Ltd while working with them, due to it being a private project the repo is outdated, all changes are being pushed to the repo made for the organization

Skills used: React Js, SCSS

Netflix Clone <https://goit-streamit.netlify.app/>

This is a Netflix website i developed using React Js

Skills used: React Js

GO Quiz <https://go-quiz-project.netlify.app/>

This is a quiz web app developed using React Js, some Node Js and MongoDB, it was built for an interview test, i hope you like it

Skills used: React Js, SCSS, Node Js, Mongo DB

GOIT <https://onukwilip.github.io/GO-IT/>

This is a website that was developed inorder to display my skills and services. (It was my previous portfolio website)

Skills used: HTML, CSS, JavaScript, Bootstrap
